

## **Rebecca Bourque - Equipment Manager's Report (2015-16)**

Nothing major to report for this past year.

It seems as though we have finally figured out the timpani heads. Cross our fingers that they will last a long time! In order to keep them in pristine shape, I ask everyone please do not lean on or rest items on them.

I would like to say a huge thank you to Jean-Guy for making our wonderful case for the wind chimes. He went above and beyond what we envisioned!

We have purchased a few small items for the percussion gear. We bought two crotales to complete our set and a conducting stand for Terry.

We had the truck rental for most concerts. A big thank you to all who help load and unload the truck both at the church and at the band hall. Your help is much appreciated.

I would like to extend a thank you to Rhonda, Issac, and Steve B for lending their help and vehicles to make the Christmas concerts run smoothly.

And finally thank you to the few regulars who help out a rehearsal. As we are supposed to be out by 9:45, your help makes us make that timeline. Many hands make light work.
